A 10x10 grid maze. The start is marked by a green circle with an upward arrow at the bottom-left corner (row 10, column 1). The end is marked by a red circle at the top-right corner (row 1, column 10). The maze is defined by thick black walls on a light gray grid. The walls form a complex path that starts from the bottom-left and winds through the grid, ending at the top-right. The path is a single continuous line that visits every cell in the grid exactly once, forming a Hamiltonian path.
